Mr. Jim Heaton
Vox ISM
36 Glengowan Road
Toronto, ON

Dear Jim:

I would be pleased to act as a reference for Vox ISM and Microsoft Dynamics. Our experience during the recent implementation was as follows:

1. The go live period was far smoother than I thought it would be. The system was set up correctly, and our biggest challenge was getting users comfortable with the new screens. This is a compliment to my staff who worked hard, and your knowledgeable and experienced NAV consultants.
2. Evelyn Hill was a great help with her in-depth knowledge and very logical approach. She led us through our first month end and June 30th quarter end, which happened in our first month after going live on June 1st.
3. I think your customer care program is a great idea, and I signed up for it.
4. The software is flexible and allowed us to eliminate the standalone legacy systems used in different departments of the company. We can now report on the activities of each department in a logical and coherent way.

About STT Enviro Corp.

Our principal area of expertise is the design, assembly, construction (in Canada, supervision or management worldwide) commissioning and support of handling systems for the reagents (such as lime, soda ash and magnesium oxide) required for environmental cleanups in mining, oil and gas and other industrial applications. While our clients are most often engineering companies, our goal is to ensure we make a positive impact on the end user customer operations, reducing costs and improving efficiency – on both a daily basis and over the long term.
